

FRANCO ROMANELLI

FULL STACK - CYBERSECURITY STUDENT

Montevideo, Uruguay | +598 099 474 675 | francoromanelli1310@gmail.com

EDUCATION:

UTU - General Directorate of Technical-Vocational Education TECHNOLOGICAL BACCALAUREATE IN INFORMATICS	2022 - 2026
UDE - University Cybersecurity Analyst	2026 - currently taking

DESCRIPTION:

Graduate of a Technical High School program in Informatics, with training in software development and knowledge of HTML, CSS, JavaScript, PHP, MySQL, and Git. Currently pursuing a Cybersecurity Analyst diploma at the Universidad de la Empresa (UDE), with an interest in building a professional career focused on cybersecurity and technology. I have academic experience in web application development, databases, and IT projects.

PROFESSIONAL AND PERSONAL SKILLS

PROFESSIONALS:

- Programming (HTML, CSS, Java, JavaScript, Python, PHP basic)
- Connections frontend & backend (APIs, JSON, XML) Git + GitHub
- Database and Programs (MySQL, Superbase, Firebase)
- Bash / Linux / Kali Linux / Shell script
- Hosting - Netlify / Runtime Node.js
- Virtual Machine Installation and Use

GRADE TRANSITION PROJECT

- **Management software for housing cooperatives:**
Development of a web application for housing cooperative management featuring multiple user roles. Involvement in frontend, backend, and database development using HTML, CSS, JavaScript, PHP, and MySQL. Implementation of authentication, role-based access control, and frontend-backend integration via Fetch and JSON. Participation in requirements gathering, planning, and technical decision-making.

PERSONAL:

- **Proactivity:** Initiative to acquire new knowledge, explore tools and technologies, and take on new challenges, both during my training and in personal projects.
- **Continuous learning:** During my training for the Cybersecurity Analyst Technical Diploma at UDE, I realized the importance of constant learning, complementing the formal curriculum with research and extracurricular study.
- **Analytical thinking:** During my studies in the Technical Baccalaureate program in Computer Science, I developed a work approach focused on analysis and planning—specifically through project management, documentation preparation, process analysis, and the consideration of legal aspects related to projects.
- **Problem-solving:** Undertaking academic and personal projects, combined with constant learning and practice, enabled me to develop the ability to identify problems, analyze various alternatives, and seek practical solutions.
- **Teamwork:** Through educational experiences and collaborative projects, I developed the ability to work in a team, communicate ideas, distribute tasks, and collaborate with others to achieve common goals.
- **Adaptability:** Constant exposure to various languages, tools, technologies, and methodologies during my training and projects enabled me to easily adapt to new environments and quickly learn new tools.

LANGUAGES

Spanish — Nativ

English - Basic

ADDITIONAL INFORMATION

Professional Objective

I am seeking opportunities that allow me to gain professional experience, continue developing my skills, and contribute my knowledge in the technology sector.

Availability

Open to junior-level roles, professional placements, internships, and technology-related opportunities.
